

Worksheet for Coding with Scratch.

1. Open a web browser and go to the following [link](#).
2. Click on "Join Scratch" at the top right of the page.
3. Complete the sign-up process for your Scratch account.

Join Scratch

It's easy (and free!) to sign up for a Scratch account.

Choose a Scratch Username Don't use your real name

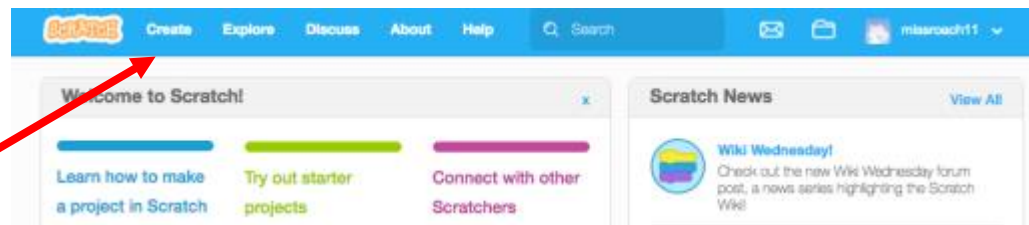

Choose a Password

Confirm Password

4. Don't forget to jot down your username and password for reference.

Let's Explore Scratch's important features

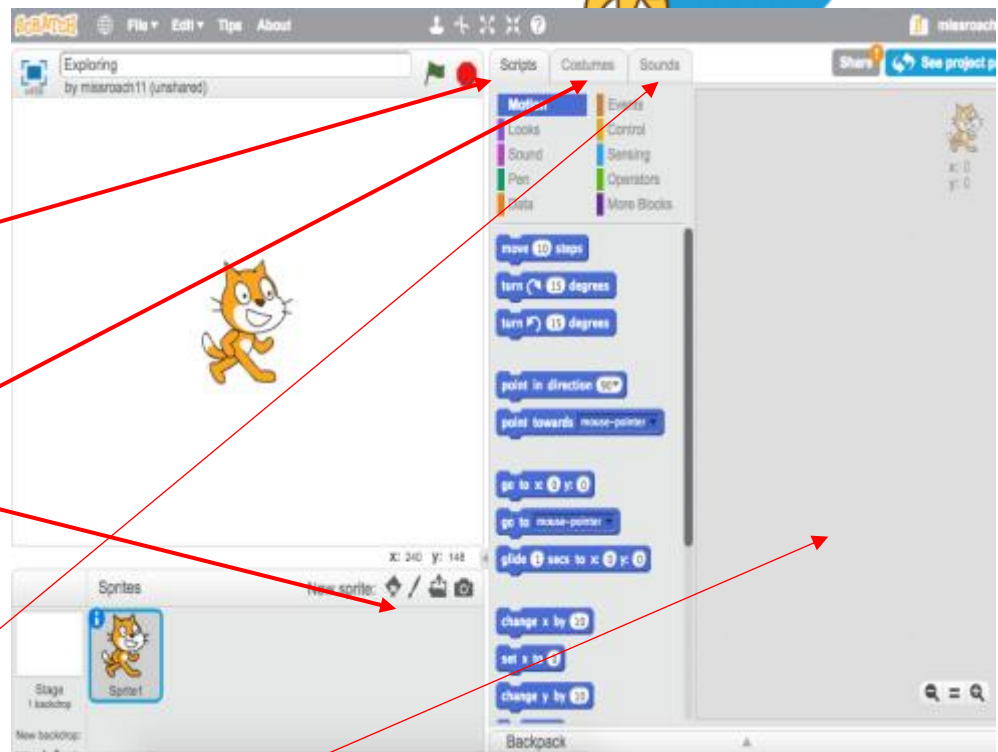

1. Once you have created your account. Click on create to begin.

2. Let's explore the Scratch platform

- a) Scripts on the right is where there are different options for moving and coding scratch to move.
- b) Under the costumes icon you can create new characters, add a background or upload an image to code scratch on.
- c) Under the sounds icon is where you can create or choose a sound to have coded to scratch.
- d) When creating your coding projects, you will drag one or more of the scripts to the far right. In order to make scratch move with your codes on the right side make sure they are linked and that you click them to watch scratch move.

Next... an activity with Scratch (STEP- BY- STEP)

In this activity, you will follow a step by step intro guide the Tips window to have Scratch dance. Once you have completed the steps and experiment by trying to add other Scratch blocks to make your own project.

Steps:

1. Follow the step by step intro in the tips window.
2. Add more blocks.
3. Then experiment to make it your own project.
